FULL STACK DEVELOPER

A results-driven **Full Stack Developer** with **6+ years of hands-on experience** in building scalable, user-centric web applications. My expertise spans the entire development lifecycle, from conceptualizing UI/UX designs to deploying robust backend systems. I specialize in modern technologies like **ReactJS, Next.js, Node.js, TypeScript, and MongoDB**, with a strong focus on performance optimization, clean architecture, and maintainable code.

PROFILE

- 6+ years of experience in **full-stack web development**, including frontend and backend architecture, product development, and business requirement analysis.
 - Proficient in **ReactJS, Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB**, and integration of third-party services and APIs.
 - Experienced in building **responsive web applications** from scratch by converting **mockups/PSDs** into pixel-perfect, reusable UI components.
 - Strong understanding of **RESTful API** design and **microservices-based architecture** for scalable and modular backend systems.
 - Worked with both **SQL and NoSQL databases** (e.g., MongoDB) to design flexible and efficient data models.
 - Familiar with **Agile methodologies** (Scrum, Kanban) and active participation in sprint planning, stand-ups, retrospectives, and timely delivery.
 - Skilled in **code optimization, performance tuning**, and following best practices for **clean, maintainable, and testable code**.
 - Experience in implementing **form validation, state management** (using Redux Toolkit), and **authentication workflows**.
 - Hands-on with **unit and integration testing** using **Jest** and **React Testing Library** to ensure code quality and prevent regressions.
 - Capable of owning features end-to-end—from **requirement analysis** and **system design** to **implementation, testing, and release**.
 - Strong **problem-solving skills** with the ability to debug complex issues and deliver robust solutions under pressure.
 - Comfortable with **CI/CD pipelines**, version control systems (Git), and working in **cross-functional teams**.
 - Fast learner with a high adaptability to new technologies, tools, and workflows.
 - Effective communicator and **team player** with a collaborative mindset, openness to feedback, and experience mentoring junior developers.
 - Passionate about delivering **user-centric products** with attention to UI/UX details and long-term maintainability.
-

TECHNICAL SKILLS

Programming Skills	ReactJS, Nodejs, TypeScript, JavaScript,HTML, CSS
Frameworks & Libraries	ReactJS, Redux, RxJS, NextJS, TypeScript, NodeJS, NestJS, Tailwind, Material UI, Bootstrap
Databases	MongoDB, MySQL, PostgreSQL, SQL, Firebase
Development Tools	Cursor, VS Code, GitHub Copilot, Claude, Antigravity
Task Management	Atlassian JIRA, Trello, Asana, Basecamp
Source code Management	Git, Bitbucket, GitLab

Operating systems	Windows, Ubuntu Linux
Cloud Platforms	Amazon Web Services (AWS), Microsoft Azure

PROFESSIONAL EXPERIENCE

JEAVIO INDIA PVT.LTD, VADODARA, GUJARAT (Remote)

June/2024 - April/2026

Senior Software Engineer

Contributing to the development of *Distinct*, a platform comprising a custom design system, site builder, and admin analytics portal. Built reusable and scalable UI components using ReactJS, TypeScript, and Tailwind CSS to create a consistent design system. Leveraged these components to develop dynamic, customer-facing websites through a site builder. Implemented schema-driven forms using React Hook Form and Yup for runtime customization. Developed analytics features in the admin portal to visualize user activity, event registrations, and engagement metrics, supporting data exports and email reporting. Integrated secure REST APIs using Node.js and MongoDB, and ensured code reliability through unit testing with Jest and React Testing Library. Collaborated in Agile teams to deliver high-quality, modular solutions for enterprise clients.

THE ONE TECHNOLOGIES, AHMEDABAD, GUJARAT

Feb/2023 - April/2024

Team Lead

Appointed as team lead and Full Stack Developer responsible for designing and developing web applications for various purposes within the company.

Implemented and ported custom web applications, where my role involved frontend development, creating UI from scratch using Figma for various web applications, ensuring high-quality and visually appealing user interfaces.

Additionally, responsible for creating backend APIs using Node.js to support the functionality of the web applications, ensuring seamless integration between frontend and backend components.

Provided comprehensive training in React and Node.js to freshers, ensuring they acquire the necessary skills for project development and contributing to their professional growth.

Actively participated as a recruitment team member, leveraging expertise in the hiring process to select senior and junior full stack developers, thereby enhancing the team's capabilities.

Demonstrated proficiency in agile processes and Scrum model practices through day-to-day project planning, ensuring effective project management and delivery.

PEERBITS, AHMEDABAD, GUJARAT

Dec/2021 – Feb/2023

Software Engineer

Dedicated Developer leading end-to-end solution delivery in an agile environment. Developed customized web application using React.js frontend. Provided mentorship and guidance to junior team members.

ZIGNUTS TECHNOLAB PVT.LTD, GANDHINAGAR, GUJARAT (Remote)

Oct/2020 – Nov/2021

Junior Web Developer

Learned Next.js and worked on live projects including Edumeet, eFamo, Dentware, new2, and matcho. Managed Bitbucket repositories and worked within the AWS environment.

Trainee MERN Stack Developer

Acquired skills in Node.js, Express.js, and Sails.js.

Gained proficiency in working with MySQL and MongoDB databases.

Built REST API services using Node.js and conducted in-depth study of the Advanced React.js framework.

Explored template engines such as EJS, PUG, and Handlebars.

ZERONSEC INDIA PVT.LTD, JUNAGADH, GUJARAT

Sep/2019 – Sep/2020

Trainee Frontend Developer

Acquired knowledge of new technologies and frameworks.

Developed advanced UI for effective communication.

Conducted detailed study of Advanced JavaScript & Bootstrap Framework.

Learned React and Redux Saga.

Trainee Software Developer

Learned core technologies and software development life cycle (SDLC) processes.

Gained insights into achieving SDLC objectives.

PROJECTS

Distinct- Enterprise CX Platform

Full Stack Developer, Team Size: 20-25

Technologies: ReactJS, TypeScript, Tailwind CSS, Node.js, MongoDB, React Hook Form, Yup, Jest, REST APIs

- Developed a scalable Design System using reusable, accessible components with ReactJS, TypeScript, and Tailwind CSS for consistent UI/UX across all modules.
- Built a Site Builder tool that enables dynamic generation of customizable event websites for customers using schema-driven configurations.
- Implemented schema-based form rendering and validation using React Hook Form and Yup, allowing runtime customization of registration and feedback forms.
- Developed and maintained the Admin Portal for business users to analyze campaign data including user registrations, event attendance, and engagement metrics.
- Integrated secure RESTful APIs for brands, campaigns, events, and user data using Node.js and MongoDB to power the analytics dashboards.
- Built features for CSV data export and automated report delivery via email to enhance real-time business insights for end users.
- Ensured code quality through unit and integration tests using Jest and React Testing Library.
- Followed Agile methodologies with sprint planning, stand-ups, and code reviews to deliver modular and production-ready features.

Post Graduation - Scholarship Portal

Dedicated Frontend Developer, Team Size: 8-12

Technologies: Next.js, TypeScript, Tailwind CSS, zod library for validations

- Developed frontend using Next.js, converting design specs to JSX.
- Ensured responsiveness with Tailwind CSS across devices.
- Implemented form validation using zod library.
- Integrated TypeScript for code maintainability.
- Efficiently integrated APIs for dynamic data display.
- Created reusable components/hooks for code reusability.
- Participated in active code reviews for quality.
- Demonstrated problem-solving skills for frontend performance optimization.
- Engaged in continuous learning for emerging technologies.

Lenarge - Transportation Management System

Full-stack Developer, Team Size: 3-4

Technologies: React JS, TypeScript, Node JS, MongoDB, Firebase

- Developed APIs for managing transportation demands and other modules.
- Implemented frontend components using React JS with TypeScript.
- Followed a component-based coding structure.
- Integrated APIs for seamless communication between frontend and backend.
- Implemented skeleton loader for improved user experience.
- Handled API fallback scenarios for robustness and reliability.

Backtoit - Link Collection & Organization App

Full-stack Developer, Team Size: 4

Technologies: Next.js, React, Node.js, NestJS, MongoDB, Mongoose, RESTful API, AWS S3 bucket,

- Led full-stack architecture with Next.js frontend and NestJS backend.
- Implemented secure user authentication with Next.js and NestJS.
- Collaborated on RESTful API design with MongoDB and Mongoose.
- Configured AWS S3 for secure link asset storage.
- Developed core server-side logic for Backtoit.
- Collaborated on a cohesive UI with React and Next.js.
- Contributed to the admin panel for user management.
- Implemented role-based access control.
- Actively participated in code reviews and optimization.
- Defined well-designed application architecture.

Aramis - Security Risk Management

Frontend Developer, Team Size: 4

Technologies: React JS, TypeScript, Tailwind CSS, Ant Design Charts

- Implemented interactive Statistics and Map charts using **Ant Design Charts** and optimized data tables to deliver enhanced user insights and real-time security visualization.
- Implemented complex asynchronous event handling and state management using **RxJS** observables to optimize real-time data streams.
- Utilized **React Query** for efficient API integration, data fetching, caching, and state management.
- Followed a component-driven architecture using **React** with **TypeScript** to ensure type safety and maintainability.
- Applied **Tailwind CSS** for clean, responsive, and consistent UI styling.

Hubilo - Virtual Event Organiser

Full-stack Developer, Team Size: 10

Technologies: React JS, Node JS, and TypeScript, Redux

- Developed end-to-end features in a large-scale virtual event platform using React JS and Node JS.
- Implemented advanced React patterns such as Custom Hooks, memoization, and callback optimizations.
- Followed a modular, component-based architecture for scalable and maintainable code.
- Managed seamless API integration for dynamic data interactions between frontend and backend.
- Integrated Redux for global state management across complex user flows.
- Implemented skeleton loaders to enhance perceived performance and user experience.
- Handled API fallback scenarios to improve application reliability and error handling.
- Collaborated closely with cross-functional teams to ensure timely delivery and consistent UX.

Kencor Health - Health Ecosystem

Frontend Developer, Team Size: 4

Technologies: React JS, TypeScript, Strophe.js, React-bootstrap.

- Implemented real-time chat functionality using **Strophe.js** for seamless XMPP communication.
- Built responsive and accessible UI components using **React-Bootstrap** and **TypeScript**.
- Utilized **React functional components** and **Hooks** for clean and efficient code architecture.

- Employed **Redux** for effective state management across the application.
- Wrote **unit and integration test cases** using **Jest** to ensure application stability and reliability.
- Followed modular and reusable component structures for better scalability and maintainability.

efamo - Geosocial networking & Dating APP

Full-stack Developer, Team Size: 4

Technologies: HTML, CSS, React JS, Nodejs, React Router, Axios, Redux, JavaScript, bootstrap, material UI

- Developed a **geosocial dating platform** enabling users to like or dislike based on photos, bios, and shared interests.
- Implemented **authentication** via Phone Number, Email, and Facebook during Sign In/Sign Up processes.
- Built an **Admin Panel** for managing users and **credit points**, supporting both **Admin** and **Sub-admin** roles with role-based access control.
- Designed frontend UI including **tables with pagination, sidebar navigation**, and clean layout using **Bootstrap** and **Material UI**.
- Used **Axios** for API communication and **Redux** for global state handling.
- Managed routing and navigation with **React Router** for a seamless single-page experience.

Dentware - Dental Clinic Management

Full-stack Developer, Team Size: 4

Technologies: HTML, CSS, React JS, NodeJS, React Router, Axios, Redux, JavaScript, reactstrap.

- Dashboard overview of data in Charts Format.
- Add Patient & appointments.
- Calendar based on availability of doctor for patient & upcoming appointments for doctors.
- Filter based on Doctor & Date of availability.
- Compare the patient's report based on previous appointments. (Compare X-ray images & previous data).
- Setting module (role base module access)

New2 - Information, Service & Networking Platform

Frontend Developer, Team Size: 4

Technologies: HTML, CSS, Next.JS, Axios, Redux, JavaScript

- Built a dynamic multi-language platform combining **information, services, and networking** in a single app.
- Developed UI components for **Trending Articles, Audios, Videos, E-learning, Jobs, News & Events** sections.
- Implemented user engagement features including **Bookmark, Like, and Share** functionality.
- Integrated **search and filter** capabilities for improved content discovery.
- Added support for **multi-language content** to enhance accessibility and user reach.
- Used **Axios** for efficient API communication and **Redux** for managing global application state.
- Implemented **Advertisement display and subscription logic** to support monetization and user interaction.

EDUMEET - Education Meet

Backend Developer, Team Size: 4

Technologies: Node.JS, AWS, JavaScript, openVidu

- Integrated **OpenVidu** Library APIs to enable real-time video calling and virtual meeting functionality.
- Developed backend services using **Node.js** with both **Express.js** and **Sails.js** frameworks.
- Implemented **AWS S3** integration for secure and scalable image uploads.
- Ensured smooth communication between client and server through well-structured RESTful APIs.
- Focused on performance optimization and secure handling of media content for a reliable user experience.

ACADEMICS

Qualifications:	B. E. Computer (GUJARAT TECHNICAL UNIVERSITY)	2021	93.70 %
	HSC (GUJARAT SECONDARY AND HIGHER SECONDARY EDUCATION BOARD)	2017	89.90 %
